Experience

AMN Healthcare

Remote, KS

Senior Consultant I, Technical Support

August 2022 - Present

- Collaborated with cross-functional teams including DevOps, QA, and Product Management to understand user requirements and offer valuable insights for solution development.
- Conducted thorough manual testing and documented reproducibility steps for reported behaviors, facilitating efficient triaging and resolution by the development team.
- Actively participated in bi-weekly feature testing sessions, consistently providing feedback to ensure the reliability and usability of newly developed features.
- Assisted with API security testing and learned Postman to support another team, enhancing cross-functional collaboration.

Projects

- Weather Application
<https://github.com/chelrochester/WeatherApp-react>
- Space Tourism multi-page project
<https://github.com/chelrochester/Space-Tourism>
- TV Series Tracker
<https://github.com/chelrochester/tv-tracker-series>
